# INTELLIGALE

AI-Powered Business Process Automation for Enterprises

Gale Lisette

CEO «Intelligale»

Founder's Message

"At Intelligale, we believe automation should deliver measurable business outcomes, not just technology experiments. Our mission is to help enterprises cut costs, reduce risks, and accelerate growth by building custom AI and RPA solutions that align with their industry workflows. We don't sell generic tools — we deliver automation that pays for itself."

Company Overview

We are a driven team of innovators committed to turning ideas into real business value. Our focus is on creating powerful SaaS solutions that don't just work — they help companies grow faster, streamline operations, and achieve measurable results. With every project, we combine technology, creativity, and relentless attention to detail to deliver more than expected.

Services

AI Claims Automation	Compliance Workflow Orchestrator	Vendor Onboarding Automation
AI Revenue Cycle Automation	Fraud Detection & Dispute Automation	AI Maintenance Scheduler

Problem

- Enterprises spend billions annually on manual, repetitive processes.
- Compliance, claims, and approvals are error-prone and slow.
- Legacy systems can't keep up with regulatory change and customer expectations.
- As a result, companies lose revenue, face penalties, and see rising costs.

Solution

- AI + RPA platform designed for regulated industries (finance, healthcare, insurance, manufacturing)
- Custom automation workflows — tailored to industry-specific needs.
- Rapid ROI: most clients see measurable savings in 6–12 months.
- Enterprise-grade compliance and security.

Mission

Our mission is simple: empower businesses with tools that save time, cut costs, and unlock new opportunities for success

Market Stats

30–50%
potential cost reduction from automation

$25B+
annual RPA/AI market in the US, CAGR > 20%

70%
of executives rank automation as a top-3 priority
