

Compliance Workflow Orchestrator

Streamline compliance operations, reduce regulatory risk, and cut costs with AI-driven automation

Financial institutions are facing record compliance costs and increasing regulatory scrutiny. Intelligale delivers a platform that automates compliance workflows, ensures accuracy, and protects firms from billion-dollar risks

The Challenge

Compliance Has Become Unmanageable

Regulatory requirements (SEC, FINRA, AML, GDPR) change constantly

Manual reviews are error-prone and extremely costly

Compliance teams are overwhelmed by growing reporting demands

Penalties for violations exceed \$10B annually across US financial services

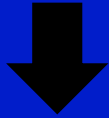

The Business Impact of Inaction

The Cost of Falling Behind

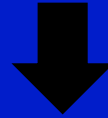

**Multi-million
dollar** fines from
even minor
compliance
failures

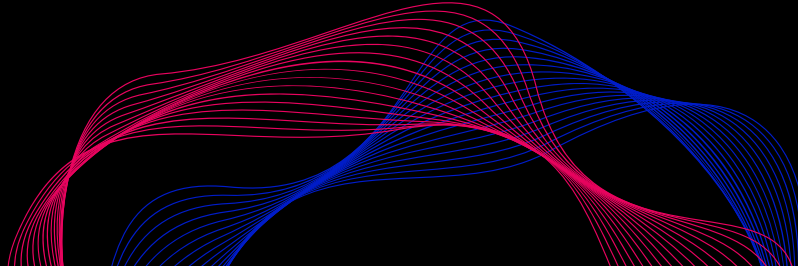

**Damaged
reputation** and
loss of customer
trust

**Inefficient
processes**

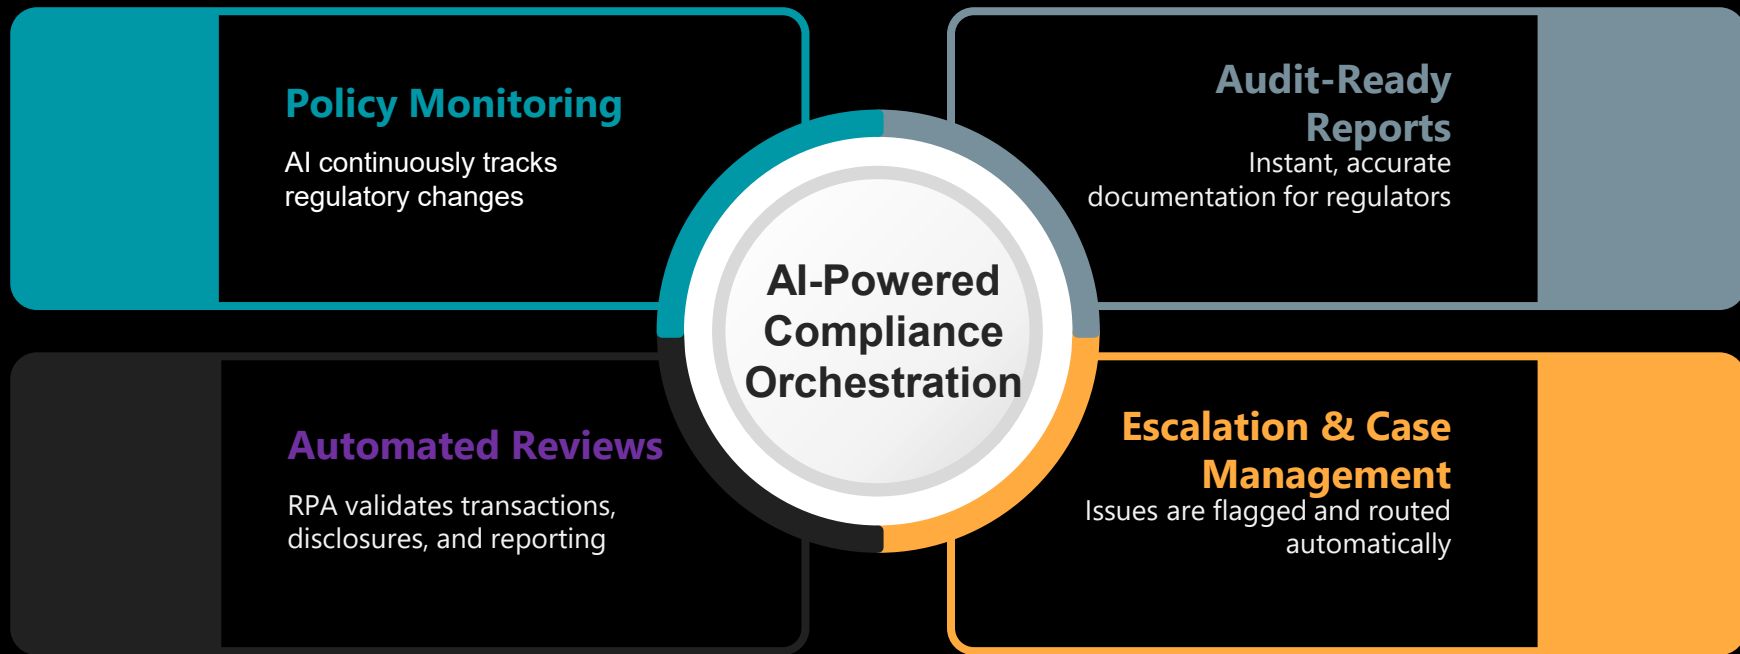

**Talent
shortage:**
compliance
professionals
are expensive
and scarce

Our Solution

Intelligale's platform centralizes and automates compliance workflows:

Proven ROI

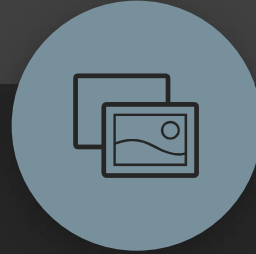

Our clients typically achieve:

30–40% reduction in compliance costs (headcount, manual reviews)

50% faster reporting cycles, reducing regulator pressure

Near-zero audit errors, lowering the risk of fines

Stronger risk management, improving investor and client trust

How It Works

Why Leading Enterprises Choose Us

ROI-first approach:

Our clients typically cut operational costs by 30–50%

Enterprise-grade compliance and security: Built for regulated industries.

Custom automation tailored to your workflows:

No generic templates, every solution is industry-specific

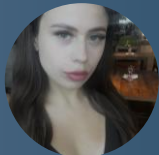

Expertise you can trust:

Our AI architects and automation engineers have over a decade of experience in enterprise automation.

INTELLIGALE

AI-Powered Business Process Automation for Enterprises

Gale Lisette

CEO «Intelligale»

Founder's Message

"At Intelligale, we believe automation should deliver measurable business outcomes, not just technology experiments. Our mission is to help enterprises cut costs, reduce risks, and accelerate growth by building custom AI and RPA solutions that align with their industry workflows. We don't sell generic tools – we deliver automation that pays for itself."

Company Overview

We are a driven team of innovators committed to turning ideas into real business value. Our focus is on creating powerful SaaS solutions that don't just work – they help companies grow faster, streamline operations, and achieve measurable results. With every project, we combine technology, creativity, and relentless attention to detail to deliver more than expected.

Services

AI Claims Automation

Compliance Workflow Orchestrator

Vendor Onboarding Automation

AI Revenue Cycle Automation

Fraud Detection & Dispute Automation

AI Maintenance Scheduler

Problem

- Enterprises spend billions annually on manual, repetitive processes.
- Compliance, claims, and approvals are error-prone and slow.
- Legacy systems can't keep up with regulatory change and customer expectations.
- As a result, companies lose revenue, face penalties, and see rising costs.

Solution

- AI + RPA platform designed for regulated industries (finance, healthcare, insurance, manufacturing)
- Custom automation workflows – tailored to industry-specific needs.
- Rapid ROI: most clients see measurable savings in 6–12 months.
- Enterprise-grade compliance and security.

Mission

Our mission is simple: empower businesses with tools that save time, cut costs, and unlock new opportunities for success

Market Stats

30–50%

potential cost reduction from automation
