

Insurance Claims Automation

Insurance Claims Are Slower and Costlier Than Ever

Manual review and verification often take 2–3 weeks per claim, creating delays and customer frustration

Customers expect near-instant claims approval, yet traditional processes cannot keep pace

Fraudulent claims cost insurers over \$40 billion annually in the US alone

Operational costs grow 10–15% per year

The Business Impact of Inaction

What Happens If Nothing Changes

- ⬡ Delayed payouts lead to customer churn: policyholders are quick to switch to competitors offering faster claims.
- ⬡ Errors expose insurers to lawsuits and fines: even small mistakes can create multi-million-dollar liabilities.
- ⬡ Rising operational costs reduce profitability: manual labor costs are growing 10–15% annually.
- ⬡ Competitors are adopting automation now: those who delay risk falling behind permanently.

Our Solution

AI-Powered Claims Automation

Intelligale delivers a modern automation platform designed specifically for insurance claims. Our solution combines Artificial Intelligence and Robotic Process Automation (RPA) to create a seamless, error-free workflow:

AI Fraud Detection: Instantly detects suspicious claims and reduces fraud exposure.

RPA Workflows: Automates repetitive steps such as data entry, verification, and routing.

Real-Time Updates: Keeps customers informed automatically, lowering call center volume.

Scalable and Secure: Built to handle enterprise-level claims volume while ensuring compliance with regulations.

Proven ROI

Tangible Results Within 6–12 Months

Companies that deploy Intelligale's claims automation achieve measurable outcomes:

70% faster claim resolution: processing time drops from weeks to days

Up to 40% reduction in fraud-related losses: fewer fraudulent payouts

30–50% lower operational costs: savings in manual labor and error correction

Improved customer satisfaction and retention: faster service builds trust and loyalty

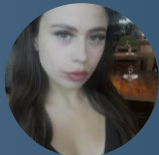

How It Works

Why Intelligale

AI-Powered Business Process Automation for Enterprises

Gale Lisette

CEO «Intelligale»

Founder's Message

"At Intelligale, we believe automation should deliver measurable business outcomes, not just technology experiments. Our mission is to help enterprises cut costs, reduce risks, and accelerate growth by building custom AI and RPA solutions that align with their industry workflows. We don't sell generic tools – we deliver automation that pays for itself."

Problem

- Enterprises spend billions annually on manual, repetitive processes.
- Compliance, claims, and approvals are error-prone and slow.
- Legacy systems can't keep up with regulatory change and customer expectations.
- As a result, companies lose revenue, face penalties, and see rising costs.

Solution

- AI + RPA platform designed for regulated industries (finance, healthcare, insurance, manufacturing)
- Custom automation workflows – tailored to industry-specific needs.
- Rapid ROI: most clients see measurable savings in 6–12 months.
- Enterprise-grade compliance and security.

Mission

Our mission is simple: empower businesses with tools that save time, cut costs, and unlock new opportunities for success

Custom automation

Custom automation tailored to your industry's workflows – no generic templates

– 30–50%

Our solutions typically cut operational costs by 30–50% while increasing processing speed and accuracy.

Why Leading Enterprises Choose Us

ROI-first approach:

Our clients typically cut operational costs by 30–50%

Enterprise-grade compliance and security: Built for regulated industries.

Custom automation tailored to your workflows:

No generic templates, every solution is industry-specific

Expertise you can trust:

Our AI architects and automation engineers have over a decade of experience in enterprise automation.
