

# Vendor Onboarding Automation

Eliminate procurement delays and ensure compliance from day one

**Vendor onboarding is one of the slowest and most error-prone processes in procurement. Intelligale helps enterprises automate vendor verification, contract processing, and approval workflows — reducing risk, saving time, and accelerating business growth**

# A Broken Vendor Onboarding Process

01

Average onboarding  
time: 4–6 weeks

02

Procurement teams  
overwhelmed with  
repetitive follow-ups

03

Manual data entry  
creates errors and  
delays

# The Hidden Costs of Slow Onboarding

**Lost opportunities  
from delayed vendor  
engagement**

**Increased regulatory  
and compliance risk**

**Higher procurement  
costs due to  
inefficiencies.**

**Supplier dissatisfaction  
reduces  
competitiveness**

# Our Solution

AI-Powered Vendor Onboarding Automation

# Intelligale automates the vendor lifecycle from verification to approval:

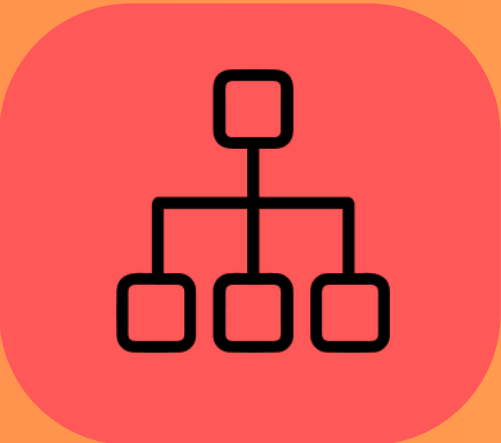

## Automated Verification

Validate vendor data against global watchlists and databases.

## Smart Contract Processing

AI extracts key terms, routes for approvals.

## Workflow Automation

Assigns tasks, tracks progress, and escalates exceptions.

## Compliance by Design

Audit-ready, regulation-aligned processes.

# Proven ROI

# Procurement Teams See Immediate Gains

**70% faster  
vendor  
onboarding**

**Millions saved  
annually through  
reduced delays  
and risks.**

**50% fewer  
compliance  
errors.**

**Procurement  
staff focus on  
strategy, not  
paperwork.**

# Why Leading Enterprises Choose Us

## **ROI-first approach:**

Our clients typically cut operational costs by 30–50%

**Enterprise-grade compliance and security:** Built for regulated industries.

## **Custom automation tailored to your workflows:**

No generic templates, every solution is industry-specific

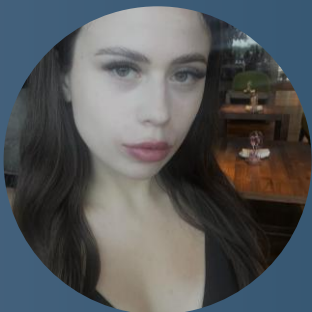

## **Expertise you can trust:**

Our AI architects and automation engineers have over a decade of experience in enterprise automation.

# INTELLIGALE

## AI-Powered Business Process Automation for Enterprises

**Gale Lisette**  
CEO «Intelligale»

### Founder’s Message

*"At Intelligale, we believe automation should deliver measurable business outcomes, not just technology experiments. Our mission is to help enterprises cut costs, reduce risks, and accelerate growth by building custom AI and RPA solutions that align with their industry workflows. We don't sell generic tools — we deliver automation that pays for itself."*

### Company Overview

We are a driven team of innovators committed to turning ideas into real business value. Our focus is on creating powerful SaaS solutions that don't just work — they help companies grow faster, streamline operations, and achieve measurable results. With every project, we combine technology, creativity, and relentless attention to detail to deliver more than expected.

### Services

- AI Claims Automation
- Compliance Workflow Orchestrator
- Vendor Onboarding Automation
- AI Revenue Cycle Automation
- Fraud Detection & Dispute Automation
- AI Maintenance Scheduler

### Problem

- Enterprises spend billions annually on manual, repetitive processes.
- Compliance, claims, and approvals are error-prone and slow.
- Legacy systems can't keep up with regulatory change and customer expectations.
- As a result, companies lose revenue, face penalties, and see rising costs.

### Solution

- AI + RPA platform designed for regulated industries (finance, healthcare, insurance, manufacturing)
- Custom automation workflows — tailored to industry-specific needs.
- Rapid ROI: most clients see measurable savings in 6–12 months.
- Enterprise-grade compliance and security.

### Mission

Our mission is simple: empower businesses with tools that save time, cut costs, and unlock new opportunities for success

### Market Stats

10+ years of experience

Team of AI architects and automation engineers with 10+ years of experience in enterprise solutions

Custom automation

Custom automation tailored to your industry's workflows — no generic templates

– 30–50%

Our solutions typically cut operational costs by 30–50% while increasing processing speed and accuracy.
